Patient value: desirability or personal importance of

The diagram illustrates the components of Patient Value using a series of icons and mathematical symbols:

- VALUE**: Represented by a teal icon of a person's head and shoulders, with two hands holding the head from below.
- =**: A black equals sign.
- QUALITY**: Represented by a purple checkmark inside a square box.
- COST**: Represented by a large orange dollar sign (\$).
- =**: A black equals sign.
- Outcomes + Patient Experience**: The numerator of the final fraction, with a yellow plus sign between the two terms.
- Direct Costs + Indirect Costs**: The denominator of the final fraction, with a yellow plus sign between the two terms.

$$\text{VALUE} = \frac{\text{QUALITY}}{\text{COST}} = \frac{\text{Outcomes} + \text{Patient Experience}}{\text{Direct Costs} + \text{Indirect Costs}}$$
